

Summer Flight Adventures

Summer Camp Program - July 2023

Program Description

It's a dream camp for a young pilot! This two weeks-long camp combines aviation theory and flight simulator time. Students (ages 12-15) will learn about the basic principles of flight: how aircraft fly, aircraft controls and flight instruments, flight planning and navigating, weather, and more. The highlight of the camp is our state-of-the-art Boeing 737NG simulator that the students will fly, takeoff and land (safely). Our Boeing 737NG simulator carefully models one of the most popular aircraft ever made in painstaking detail. We will also use our Single-Engine simulator to practice and understand the basics of flight. Campers will be learning and having fun all at once!

Program Goals

Our program offers the ability to live in the exciting world of aviation. Students will understand the basics and history of flight, and will develop crucial skills of cooperation. Campers will learn how to act under pressure and to take responsibility for their in-flight actions; they will even practice math and physics while enhancing their own leadership skills. The highlight of this program will be a complete simulated solo flight - takeoff, climb, cruise, descent, approach and landing (just like a real pilots practice in the real world). Afterwards, students will get our GFA wings! Students will get to really feel what it's like to be a pilot. Who knows - they might fall in love with aviation just like we did!

The Team

Our team is comprised of multiple members, including a real world instrument pilot with hundreds of hours of simulator experience in the Boeing 737NG and the Single-Engine aircraft.

Materials, Supplies and Equipment

We will use our state-of-the-art Boeing 737NG simulator and our Single-Engine simulator. The classroom sessions will take place in our briefing room where we will discuss, demonstrate and calculate the art of flight. These sessions will be followed by practice flights in the simulators, where students will get to understand the concepts straight from the captain's seat.

Program Schedule & Detail

- Age: 12-15
- Program start: 07/10/23
- Program end: 07/21/23
- Program runs Monday through Friday
- Start time: 10:00 AM. End time 02:00 PM
- The cost for the program - \$1,075 plus tax.
- A deposit of \$540 plus tax is required to secure your spot for this program.
- Pack a lunch and water for your child.
- Mandatory face mask in the center for each student and the staff
- Location - 609 Neponset St., Suite 2, Canton MA 02021
- We will only be accepting 10 students.
- **We may close registration at an earlier date to due to capacity limitations**
